About the Center

Center Highlights

- Why a key subset of scientists chose to lend their scientific authority to the "environmental backlash," the countermovement that has mobilized to defuse widespread concern about perceived environmental threats, including human-induced climate change:

- What factors influenced residential water demand in Aurora, Colorado, during drought:

Prometheus is the Center’s weblog. Recent posts:

- LA Times on Adaptation, by Roger Pielke, Jr.
- Update on Falsifiability of Climate Predictions, by Roger Pielke, Jr.

Sample of Recent Publications:

- The technological advances needed to stabilize carbon dioxide emissions may be greater than we think:

- A comprehensive and longer-term perspective on IPCC predictions suggests that more recent predictions are not obviously superior in capturing climate evolution:

- Economic damages from hurricanes have increased in the U.S. over time due to greater population, infrastructure, and wealth on the U.S. coastlines, and not to any spike in the number or intensity of hurricanes:
