

ENVS COLLOQUIUM SERIES 2009

Restoring the Earth:
no easy answers

one scientist
one humanist
one policy expert
one topic...

not your ordinary talk.

Mondays | Spring 2009

Environmental problems are interdisciplinary by nature. They jump fences. They cross boundaries. They don't respect borders. So what does happen when you mix three scholars from different backgrounds and ask them to comment on one topic? Join us and see. Refreshments starting at 3 pm.

FEB 16

DAM REMOVAL: ADVOCACY, RESISTANCE, & FEASIBILITY
WILLIAM LEWIS, *CIRES CENTER FOR LIMNOLOGY*
